

## CLAIMS :

What I claim as my invention is:

Claim number 1 (Currently amended) :

~~To make a pancake pastry without having to know the necessary ingredients and their quantity, easily quickly and cleanly using only one kitchen utensil (the invention).~~ A method for making a pancake batter comprising a cylindrical plastic bottle that is flexible translucent and light brown, said bottle having got two handles, said bottle having a spout at its top, said bottle being hermetically closed at its top by a large twisting cap as large as the bottle, said large twisting cap having itself a small sliding cap in the middle, said bottle having three levels of filling indicated by engraved arrows, said bottle being engraved from its bottom to its top by the words "MILK", "FLOUR", "+ 2 EGGS", "+ 1 PINCH OF SALT", "SHAKE" indicating the steps of said method, said bottle being engraved at its top by the words "THE PANCAKE BOTTLE" indicating the unique usage of said method.

Claim number 2 (Currently amended) :

~~To store a pancake pastry into a refrigerator door.~~ The method according to claim 1, distributing to an user said bottle with said twisting cap, the user removing said twisting cap and introducing milk until the first arrow, then flour until the second arrow, then two eggs, then a pinch of salt and replacing said twisting cap on said bottle, shaking said bottle until said pancake batter is mixed.

Claim number 3 (Currently amended) :

~~To pour out a pancake pastry precisely into a frying pan using two different openings.~~ The method according to claim 1, with reference to the accompanying drawing.
